ATLAS SITSAFE™ TABLE

Designed and manufactured in Australia

Product code: ML0001

The Atlas SitSafe™ Table has been designed and developed by a physiotherapist. This modified table reduces the OH&S and manual handling risk to carers by eliminating the need to push a chair with a seated patient. This allows the disabled, frail and elderly to be seated at a comfortable, practical and dignified distance from the table during meals and other activities.

- Table top features one fixed centre panel and two flip up panels
- Accommodates two people comfortably
- Can be placed side by side to accommodate more people
- When panels are up, the exposed table frame is useful for balance and support during transition from standing to sitting positions
- Recessed fixed centre panel allows easy and safe lifting/lowering of flip up panels
- Recessed concealed hinges on table top
- Hygienic easy care laminate table top with durable PVC edge available in a range of colours
- 50mm x 1.6mm square tubular steel frame for added strength and stability
- Leveling foot pads take care of uneven floors

Dimensions:

Overall width: 750mm

Overall depth: 810mm

Overall height: 730mm

Individual panel depth: 270mm

Specifications:

Rectangular top available in 25mm laminate top with matching PVC edge.
