

Boum on castors

Boum on castors

Colour samples are only indicative and not binding.

design Monica Graffeo e Ruggero Magrini

Swivel chair on castors, adjustable in height by means of a gas piston. The base is in polished chrome steel and has five spokes while the body is in polypropylene. The upper part of the seat is covered with soft material supplied in two versions: in polyester fabric coated with stain-resistant Teflon and with resin on the reverse side to prevent the absorption of liquids, or in semi-matt polyurethane coated fabric that is very easy to clean. The chair is fitted with a handle covered with the same soft fabric of the upper part of the seat and with a button, fitted below the seat, that governs the gas pump mechanism.

Metal finish:

Teflon-coated fabric finish:

Polyurethane-coated fabric finish:
