

## inner SPACE

#### **ABOUT INNERSPACE**

We want to increase people's happiness and improve their health and wellbeing in the workplace.

We add value to businesses and organisations by removing the barriers to innovation, allowing people to collaborate, share ideas, feel good and focus on being productive.

Working one-on-one with our customers and partners, there is a tailormade nature to the recommendations we make to help create a successful workspace, specifically suited to meet each of their unique needs.

We explore options and offer advice on product suitability, producing a perfect mix of creative and functional qualities. Not only do our products convey a unique design and sophistication but we also customise them to ensure they are entirely compatible with the environment they are delivered into.

# DuO by 31 Degrees

plan workspaces.

Created in Australia with a vision to produce authentic and long lasting furniture solutions, 31 Degrees emphasises original design combined with ethically and sustainably sourced materials.

### DuO is designed to increase collaboration and innovation in the workplace, whilst providing warmth and elegance to open

Rather than the conventional way of thinking that collaboration occurs in a meeting space or breakout area, 70% of collaboration actually occurs at the desk.

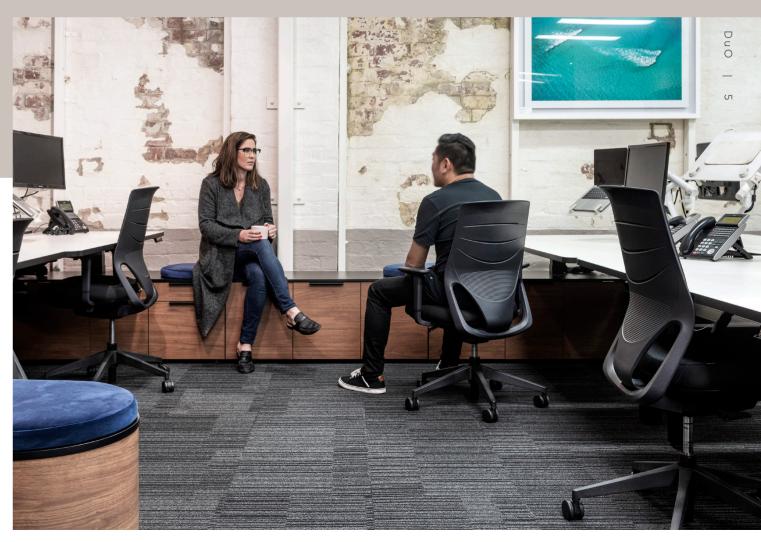

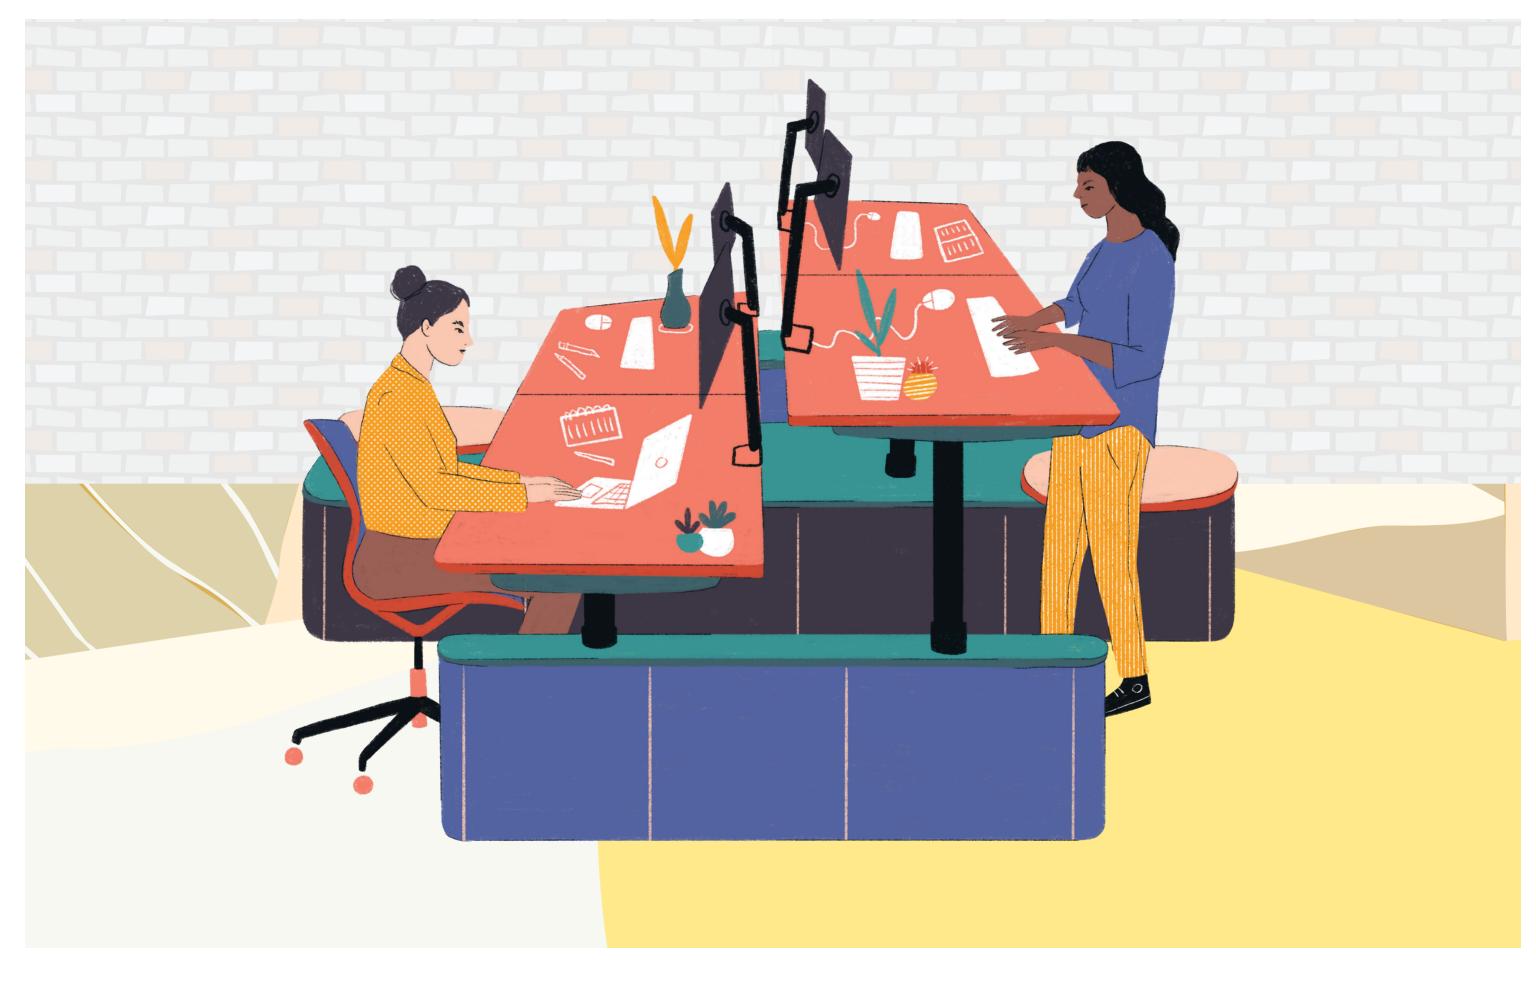

# On average most collaborative discussions consist of two people.

# So how do organisations enable collaboration at the desk for two people?

DuO helps answer this question. Team members can quickly transition from individual focus work to collaborative work by hosting a team member at their desk.

DuO storage units have been designed to allow guests to sit ergonomically and democratically at a colleague's desk. This allows team members to collaborate quickly without the need to find a dedicated space or meeting room.

### It's all in the details

#### **DuO features**

#### Storage:
