GELATO

ABOUT INNERSPACE

We want to increase people's happiness and improve their health and wellbeing in the workplace.

We add value to businesses and organisations by removing the barriers to innovation, allowing people to collaborate, share ideas, feel good and focus on being productive.

Working one-on-one with our customers and partners, there is a tailor-made nature to the recommendations we make to help create a successful workspace, specifically suited to meet each of their unique needs.

We explore options and offer advice on product suitability, producing a perfect mix of creative and functional qualities. Not only do our products convey a unique design and sophistication but we also customise them to ensure they are entirely compatible with the environment they are delivered into.

Gelato by 31 Degrees

A freestanding room within a room, Gelato creates defined, moveable spaces in modern workspaces.

Created in Australia with a vision to produce authentic and long lasting furniture solutions, 31 Degrees emphasises original design combined with ethically and sustainably sourced materials.

31

Modular and freestanding, Gelato helps to define spaces, allowing organisations to adapt and transform as their business needs change.

Quick huddles, informal meetings and planned presentations are all possible without the formality of purpose built meeting rooms.

Through its structural look, Gelato creates visual clarity and a welcoming definition to open plan offices.

Interchangeable in its design, the Gelato aluminium extrusion creates a framework of posts and beams. From there infill panels drop in to customise the aesthetic look of the system.

It's all in the details

Gelato features

- Drop-in wall panels
Double sided drop in panels to provide air gap or centrally fitted. Acoustic PET, perforated mesh, timber melamine or veneer, fabric covered, glass or whiteboard.
- Ceiling panelling
Vertical PET panels interlocks with ceiling framework.
- Curtain
With the addition of a curtain track, this adds privacy, acoustics and warmth to a space.
- Capsule tables
Frame-mounted table tops which can be mounted at different heights to create different perch locations within the system.
- Capsule seating (seating size varies)
- Planter
Add some indoor plants to the space to add colour and help purify the air
- Integrated whiteboard
Making collaboration easy.

Dimensions:

- Customised to client requirements.

Technical details:

- The wall panels are double sided with a hollow centre, allowing for power, data and AV services to be easily reticulated throughout.
- LCD screens and digital whiteboards can also be mounted to Gelato providing the necessary digital tools required for modern day collaboration, with a seamless look thanks to the hidden cabling.
- 240V power, USB 2.0 and USB C are all supported in easy to access outlets fitted directly into the frame or surface mounted into the drop-in panels. Cat 6 Data cabling is also supported.

Lighting:

- To further enhance Gelato's capability, 31 Degrees has collaborated with Rakumba lighting.
- Using Bluetooth occupancy sensors, Gelato can automatically turn on linear lighting when a user enters the space.
- Rakumba Scope pendants automatically change state (green to red) to act as occupancy indicators.
- Wireless digital controls are also available for Gelato users to dim or turn lighting on and off.

Structural capabilities:

- Gelato is non-structural and freestanding, but can be fixed to the ground or to an adjacent wall for extra anchoring.

Timeless versatility:

- Gelato can be relocated, shrunk, expanded, and adapted over time.
- The optional ceiling baffles provide a semi-open, yet defined space and take advantage of a buildings existing lighting, air conditioning, and fire services.
