“The Napier range celebrates the transparency and refraction of crystal – Almost entirely invisible when off, but when illuminated the light catches the chamfered edges of the geometric volume, like a 3D drawing with light that creates a soft atmospheric glow.”

Scott Fitzsimon

NAPIER

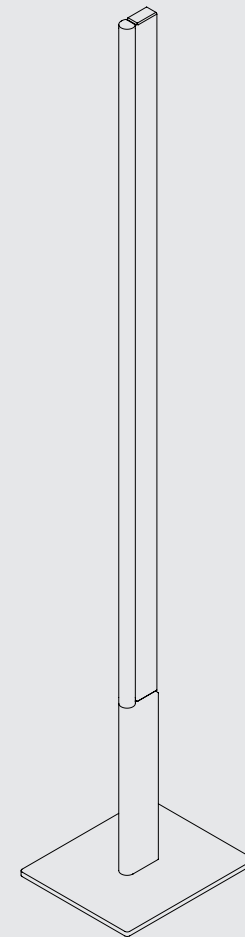

RP-E-2103

The Napier collection embodies a mesmerizing blend of sleek architectural design and the elegant allure of crystal.

Evoking majestic skyscrapers of New York City and infused with Art Deco elegance reminiscent of designer Scott Fitzsimons' hometown in New Zealand, Napier celebrates the transparent and light-refracting properties of crystal. When unlit, Napier appears transparent and monolithic, coming alive upon illumination. Light delicately dances across the chamfered edges of Napier's geometric form, casting a mesmerizing jewel-like glow.

Used individually or arranged in linear formations above counters, Napier pendants offer architecturally minimalist lighting solutions. For more artful installations, multiple crystal columns of varying lengths can be pivoted to contrasting angles, resulting in striking chandelier compositions.

Napier's statuesque floor lamp and wall sconce exude architectural elegance while providing adjustable directional illumination.

“Light is such a special medium to work with – going beyond the physical form of the product with the power to create atmosphere, change your mood and influence the experiences we have within the built environment.”
