RP-E-2401

Capturing a mutual passion for botanical beauty, the Petal collection reflects Sebastian Herkner's ongoing creative dialogue with Rakumba. Petal draws inspiration from the texture, form and colour of flowers within Sebastian's own home.

Herkner represents the delicacy of floral structure through a hand drawn radiating texture on the glass surface, splaying outwards from a gently curved, glowing light. The light source is embraced within two asymmetric 'petals', refracting a subtle spectrum of highlights and shadows. This unique form is presented as a pendant and wall sconce in two scales, with an alluring table lamp edition completing the series.

*"The design of a lamp goes beyond form or use,
it goes directly to emotion."*

Nahtrang

Nahtrang Studio, founded in 2004 by Ester Pujol and Daniel Vila in Barcelona, embodies the city's industrial and cultural essence. Their work showcases a minimalist approach characterized by simplified forms and iconic visual balance.

Specializing in lighting design, the studio continuously explores the potential of illumination and diverse material applications. Their innovative creations have garnered recognition from prestigious awards including the IF Awards, NYCxDDesign, BOY Awards (NY), and Premis Delta, among others.
