# Kaschkasch

- The German designer duo, Florian Kallus and Sebastian Schneider
- Product design graduates and qualified cabinet-makers
- Combining of traditional craft and innovative technology
- Collaboration with Hay, Ligne Roset, Rolf Benz and others

**Ton**

Sebastian Schneider

»The main goal was to design tables that match the company's existing products, while bringing something new to the portfolio. The conical base contrasts with the fine lines of bentwood furniture.«

Ton

Kaschkasch (DE)

»The collection's character comes mainly from the material used and the shape of the base.  
Combining three bent plywood sheets forms the basis of the entire family of tables.«

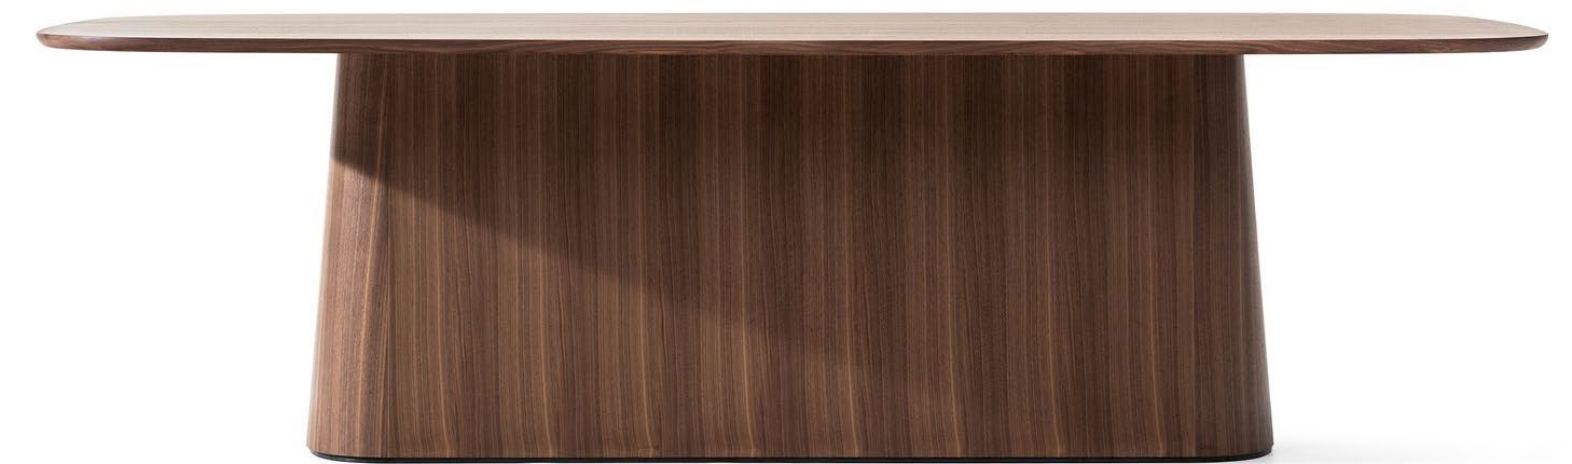

Ton

# MAIN CHARACTERISTICS

3 table base shapes

3 different table heights: coffee, dining, bar

**Ton**

# MAIN CHARACTERISTIC

6 tabletop shapes

square

# The collection also includes a stool and a trolley

The collection is rounded off by a stackable seat, in a choice of smooth or upholstered. A minimalist trolley was also designed for a larger number of stacked stools to guarantee easy handling. The maximum number of stackable smooth or upholstered stools is 10.

# Ton

# ACCESSORIES

electric sockets

Various types of electric sockets and data ports can be integrated into the table.

**Ton**

# ACCESSORIES

hooks

The bar tables have black hooks for hanging briefcases, handbags and other items. Load capacity 5 kg.

**Ton**

# AREAS OF USE

HOSPITALITY

P.O.V. tables are the optimal choice for public spaces, because they adapt wonderfully to small and large interiors. In addition to solid-wood tabletops, we also offer tabletops with high-pressure laminate (HPL) or nanolaminates that are strongly damage-resistant. Thanks to the height variations, they are suitable for bar, dining, and lounge seating.

**Ton**

# AREAS OF USE

HOME

The enormous range of dimensions and shapes in the P.O.V. collection allows the table to either completely determine the visual character of the room or remain inconspicuous.

**Ton**

# AREAS OF USE

OFFICE

The morphology of P.O.V. tables makes them ideal for work environments, such as offices or meeting rooms. They can be equipped with electrical sockets and data ports, which is a major advantage.
