

# STOIC TABLE

by cameron foggo

The Stoic Coffee Table, in its bold, minimalist form, is available in multiple sizes and composed of two halves that can be used separately or together, offering a dynamic and adaptable presence in any space. Its low, solid body brings a grounded, convenient quality to the room, while the seamless flow from the top's circumference to the legs introduces a subtle elegance that contrasts with the table's brutalist geometric forms. When joined, the two halves create a harmonious sense of balance and flow.
