

ILLUMINATE DIFFERENT WORLDS

TOOY

ABOUT

TOOY is an Italian lighting brand born in 2015 from the creative vision of Valeria Giacomozzi and Valerio Tidei, emerging out of the long heritage of GIBAS lighting in the Marche region.

Driven by a fascination with the “infinite facets of light,” TOOY believes lighting is not just about visibility, it’s about warmth, attention, reflection, and those quiet moments when you can get lost in your thoughts.

Each TOOY piece is born at the intersection of strong craftsmanship, material curiosity, and design experimentation. Their designs explore diverse forms, finishes and textures, mixing glass, brass, aluminium, and nuanced surface treatments—with a global eye toward emerging trends.

Under the artistic direction of Corrado Dotti, TOOY creates lighting that does more than decorate: it defines space. They see lighting as living elements that interact “organically” with their surroundings, balancing elegance and utility, and enhancing both residential and contract spaces.

FERROLUCE

ABOUT

Ferroluce is an Italian decorative lighting company, founded in 1982 with a mission to preserve and support Italian craftsmanship.

Ferroluce products are the result of the love and respect for tradition and materials. Simplicity, antique values and the flavour of a time gone by but which they wish to preserve. Ferroluce aim to recreate this unique atmosphere of style and elegance in every home. Their colourful handcrafted collections make use of highly skilled manufacturing techniques such as slip casting, dip glazing, glassmaking and blacksmithing. Several designs are finished with hand-painted patterns. Behind every Ferroluce object there is its own why, its own history, its own charm.

The production of their lights is performed exclusively in Italy and each item is a combination of contrasting shapes and the constant research into new chromatic alchemies. Ferroluce caters to those seeking a classical lighting solution, but also those wishing to work with a brand that is highly skilled and able to consistently produce quality and unique lighting with each piece having its own personality.

GRAU

ABOUT

GRAU is a German lighting brand redefining how we experience light emotionally, sensorially, and sustainably. Founded in 1987 and now led by the next generation, the brand creates minimalist, sculptural luminaires that support human well-being and emotional connection.

At their Hamburg headquarters, a multidisciplinary team of artists, designers, and engineers develop each piece in-house from concept to production. GRAU's vision goes beyond function: they see light as a living medium that can transform mood, atmosphere, and the way we relate to our spaces. GRAU activates people's feelings with light. Their smart lamps and sunset dimming lights create unique lighting experiences that feel magical with calming effects on the body and mind.

From unique sculptural pieces to high-tech workplace lighting GRAU has always looked for new ways to enrich life with light. For five decades and over two generations, they have experienced many changes, but have always remained true to their philosophy. That good light enriches life.

A modern dining room featuring a light-colored wooden dining table and matching chairs. The table is set with plates, glasses, and a bowl of bread. Four minimalist, teardrop-shaped pendant lights hang from the ceiling. The room has a textured wall, a large window with heavy curtains, and a white double door with glass panes. The floor is made of light wood.
