innerSPACE

environment & sustainability

who are we?

We are in the people business.

It is our interactions, relationships, collaboration, personalities, behaviours, actions and insight that determine how our brand is seen.

Our people represent our product, and our people are one of our products.

Overlay that our product creates environments, experiences and spaces for people, we really are in the business of people.

Imagination Captured is the harnessing of our creative collective minds to understand a vision for a space and then interpret that in a way that captures the imagination of the user.

innerSPACE

we source products from Australian and International designers and manufacturers

We provide high quality, well designed furniture products for:

- Commercial
- Residential
- Educational
- Hospitality
- Healthcare

We provide furniture that you don't want to throw out.

innerSPACE

safeguarding the future

INVEST

We invest in quality products and we encourage you to do the same. Furniture should be timeless and built to last and our brands encourage it!

CRAFT

Furniture should be reused, restored and reconfigured where possible. That's why we take the time to ensure that the right product is selected from the start and compatible for you!

COLLABORATIVE

We are always working together with Australian designers and manufacturers to minimise social impact and increase local employment.

innerSPACE

we commit

Innerspace are committed to achieving Environmental Excellence for current & future generations to ensure we are apart of a circular economy.

Reducing our waste and consumption of resources and increasing our recycling and reuse of materials is top of mind in every business decision we make, contributing to a more sustainable world.

As a provider of furniture products it is our policy to promote and support manufacturers that embrace environmentally sustainable initiatives and beliefs. This is inherent in our product offerings and is not a "add on" to our range.

We choose to partner with suppliers which have achieved the international ISO 14001 Environmental Management System accreditation, ISO9001 Quality Management and Forest Stewardship Council (FSC) Certification.

innerSPACE

our sustainability goals

Where we are at?

We strive to reduce our carbon footprint through responsible business practices and implementing manufacturing, packaging, transportation and in-house initiatives wherever possible.

All cardboard packaging is currently separated and recycled from our warehouse.

All paper and plastics currently recycled from our Sydney, Melbourne & Perth showrooms.

Our Perth showroom is also currently running off solar power.

We aim for our showrooms and warehouse to be carbon neutral by 2028 through ongoing operational and sustainability improvements.

innerSPACE

stewardship

Our product stewardship program exists to manage the impact of our products throughout their lifecycle.

Our objective is to maximise the efficiency of our range by supplying high quality furniture therefore extending its life cycle. This in turn will minimise the the environmental impact of the product at disposal.

When a client no longer has a use for our furniture, we will work with them to either:

- resell the product through a second hand dealer,
- arrange it to be donated to a charitable organisation
- breakdown the components to be recycled through a nominated recycler.

After all we believe that our products deserve to last a long time and that they can be repurposed for your next project wherever possible!

innerSPACE

supporting the Yarra Yarra Biodiversity Corridor

Innerspace is pleased to announce its partnership with Carbon Neutral in an effort to reduce our ecological footprint.

Located in the Northern Wheatbelt, the Plant-a-Tree program is Western Australia's most ambitious regeneration project, aimed at restoring the natural landscape and reuniting habitats by connecting small patches of remaining vegetation to create a 200km green corridor from inland to the coast.

Plant-a-Tree grows critical habitat for native wildlife on historically cleared land in a Global Biodiversity Hotspot.

For every tree purchased by Innerspace, Carbon Neutral plants an Australian native tree or shrub species in the Yarra Yarra Biodiversity Corridor. They plant on unproductive, degraded farmland with the aim of returning the land to its original condition and restoring the precious ecosystems within it.

To ensure the trees' long-term protection, a carbon covenant and carbon right are registered with the state government on the land title, safeguarding them for 100 years. This means the trees cannot be removed or compromised, even if the land is sold.

our brands in action

ACTIU

B corp certified.

ISO14001 & ISO 9001 certified

ISO14006 Eco Design.
First Spanish manufacturer with LEVEL® 2 certification under the FEMB 2023 version.

Official registration of carbon footprint Scope 1, 2 and 3 on the MITERD platform.
Implementation of a circular production model: certified wood, recycled plastics and recyclable metals.

Use of 100% renewable energy and energy efficiency that has enabled it to avoid more than 2,175 tonnes of CO_2 since 2022.

ADICO

ISO 14001 certified.

Installation of over 100 photovoltaic panels at its production facility in Avanca, generating clean, renewable energy and significantly reducing operational carbon emissions.

Anticipates an average reduction of at least 30% in direct and indirect greenhouse gas emissions through energy efficiency and on-site renewable energy generation.

In 2023, avoided 14.93 tCO_2e emissions through improved waste management and environmental initiatives, supporting its wider transition towards carbon neutrality.

CIZETA

Cizeta products use wood from controlled regrow forests certified by FSC® (Forest Stewardship Council®), in line with international “green building” standards.

Production uses renewable energy sources and energy-efficient systems including LED lighting.

Focus on local Italian manufacturing, resource efficiency and reduction of production waste.

Commitment to resource efficiency through material optimisation, waste reduction and recycling of production offcuts.

Design prioritises durability and extended product lifecycle to reduce material consumption and replacement needs.

DAUPHIN

ISO14001 & ISO 9001 certified, enhanced through EMAS certification for continuous environmental improvement

Member of the Bavarian Environmental Pact from 2007, supporting collaborative environmental action across Europe

Holds Blue Angel, EU Ecolabel and FEMB LEVEL® certification

Uses FSC® and PEFC-certified timber (E1 emissions class) and increasing recycled aluminium and post-consumer plastics

Structured carbon reduction approach (Avoid, Reduce, Compensate) with a target to reduce CO_2 emissions by 70% at headquarters by 2027 (vs. 2012)

DIABLA

ISO 9001 certified

GANDIABLASCO constantly develop technical improvements, research, and innovate in both products and materials, to guarantee a high quality, durable product composed of almost 100% recyclable materials.

Winner of the 2024 Environmental Impact category: Nomad collection by Alejandra Gandía-Blasco Lloret for GAN.

FERROLUCE

Slow Manufacturing production model based on fully handmade processes carried out individually by skilled artisans, valuing patience, attention to detail, and craftsmanship in every piece

Uses ceramic as primary material, a natural material with low environmental impact and high versatility

Individual production of each product, avoiding mass production systems
Sustainability embedded through material choice and low-impact production approach

GANDIA-BLASCO GROUP

ISO 9001 certified

GANDIABLASCO constantly develop technical improvements, research, and innovate in both products and materials, to guarantee a high quality, durable product composed of almost 100% recyclable materials.

Winner of the 2024 Environmental Impact category: Nomad collection by Alejandra Gandía-Blasco Lloret for GAN.

GAN RUGS

ISO 9001 certified

GANDIABLASCO constantly develop technical improvements, research, and innovate in both products and materials, to guarantee a high quality, durable product composed of almost 100% recyclable materials.

Winner of the 2024 Environmental Impact category: Nomad collection by Alejandra Gandía-Blasco Lloret for GAN.

our brands in action

GRAU

All lighting designed and produced in Hamburg, focusing on quality, durability and sustainability

Over 270m² of photovoltaic panels on campus, reducing CO_2 emissions by approximately 14 tonnes annually

100% LED product collection supporting reduced energy consumption

Spare parts and repair services available for up to 30 years, supporting product longevity and reducing waste

Environmentally friendly, solvent-free powder coating and comprehensive recycling systems

HUMANSCALE

B corp certified.

In 2022, Humanscale became the first furniture manufacturer to be awarded TRUE® Gold and Silver certifications for all factories globally. TRUE® stands for Total Resource Use and Efficiency and is administered by Green Business Certification Inc. (GBCI) to help facilities define, pursue, and achieve zero waste goals while becoming more resource efficient.

Zero waste policy aims for 100% waste diversion by 2030. By 2022 they diverting over 93% of waste from landfills.

MARA

ISO 9001 certified

100% energy from renewable sources, with 70% of production energy self-generated

In 2024, a new automated painting system was installed at the Brescia headquarters, powered by self-produced energy and delivering a 90% reduction in powder waste

Use of certified and responsibly sourced materials, including FSC® timber available on request and locally sourced steel with 26% recycled content

Products are designed for disassembly and recyclability, supporting circularity and end-of-life material recovery

NOMON

FSC certification in progress to support responsible sourcing and material traceability

Focus on timeless, durable design, prioritising longevity and quality over quantity

Spare parts available to extend product lifespan and reduce waste

Works with local artisans and suppliers, reducing transport emissions and supporting the circular economy

Uses eco-conscious materials and production methods to minimise environmental impact

Circular packaging approach using recyclable and biodegradable Kraft cardboard

our brands in action

NURUS

70% of energy consumption from renewable sources

24.51% CO_2 emissions reduction (2022–2023)

95% vertically integrated production model

Significant use of recycled materials including metal, wood, packaging and polypropylene

62% electric vehicle fleet

GREENGUARD / GREENGUARD Gold certified products for low-emission indoor environments
100% recyclable packaging

Calma certified with EPD, LCA, UL, ISO 23351 Class A, Indoor Air Quality and UKCA standards

PEDRALI

ISO14001 & ISO 9001 certified

Corporate Carbon Footprint assessment completed in 2021 obtaining UNI EN ISO14064-1:2019

Furnishings are designed to be disassembled

Plastics used are recyclable and eco-compatible, including recycled polypropylene components (50% post-consumer and 50% industrial waste)

All timbers used from sustainable logging, certified as FSC or PEFC

Uses plant-derived water based paints decreasing VOC's

TON

ISO14001 & ISO 9001 certified

Holders of the PEFC certificate with all furniture made from PEFC-certified wood.

Furnishings are designed to disassembled

Holders of the Plywood for the manufacture of seating furniture confirming a low formaldehyde class E1 content.

All timbers used from sustainable logging, certified as FSC or PEFC

Uses water diluted based paints decreasing organic compound emissions.

TOOU

Launched Leafee, which demonstrates its interest in the environment through direct contributions to non-profit foundations that carry out reforestation projects in suitable areas of the world.

Products are made of a mixture of recycled plastic material and natural waste, which represent the first important step taken by TOOU towards a more eco-conscious manufacturing processes that make use of eco-friendly materials and technologies.

innerSPACE

our brands in action

TOOY

Use of low environmental impact technologies in product development processes

Integration of sustainable materials within lighting production

Commitment to international product and environmental compliance standards, including UL certification for market access

Focus on responsible production development and sustainable innovation in lighting solutions

TORRE

All plywood used in products are compliant with E1, CARB2 and EPA regulations. Timber for all wooden components is sourced in an environmentally responsible manner.

Metal, Paper, cartons & Plastic waste are all handled by recycling procedures

Products are designed, developed and made to last for decades.

A commitment to reduce energy consumption utilising energy-efficient machineries for metalworks

VICCARBE

ISO 9001 and ISO 14001 certified

Member of the MITECO Carbon Footprint Register, using 100% renewable electricity and achieving scope 1 & 2 carbon neutrality in 2024 via offsetting

Environmental Product Declarations (EPDs) available, providing life-cycle impact data

SCS Indoor Advantage Gold certified for low VOC emissions

Packaging made with at least 80% recycled cardboard Responsible sourcing, including certified wood and recyclable fabrics

VERMOBIL

ISO 9001 & ISO 14001 certified, with Environmental Product Declarations (EPDs)

100% renewable electricity since 2025 (certified via Guarantees of Origin)

Products made from fully recyclable metals, designed for long life and reuse

Solvent-free, low-VOC powder coatings and OEKO-TEX® STANDARD 100 certified textiles

Packaging is fully recyclable, using cardboard with ~60% recycled content and plastics containing at least 40% recycled material
